

Graphiclite® D50 Large Format Lighting System

Model VLS-1/1032

High Quality Daylight (D50)
Illumination System on
Mobile Stand for
Maximum Flexibility

Ideal for Vertical Viewing &
Artwork Image Capture

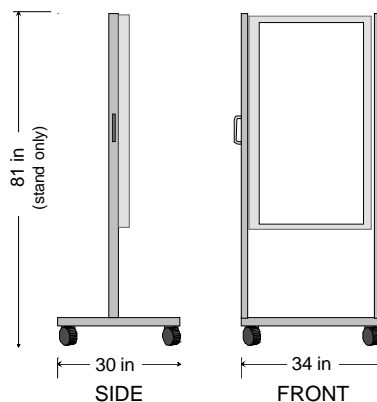

GTI is pleased to introduce the VLS-1/1032 - a unique Graphiclite lighting system that is ideal for vertical viewing and digital capture of large colored samples and artwork. The system combines a high-powered GLE-1032 light fixture with a rolling, height adjustable vertical stand that can be locked in position to illuminate a vertical surface. Two of these systems provide superb light evenness over large surfaces.

Features include dual intensity control and the GTI LiteGuard II viewing system monitor (indicates when unit is warming up and when unit needs to be relamped). For taller formats, the VLS-2/1032 offers a dual luminaire system (pictured below right) to deliver 8' - 10' of vertical wall illumination.

The GLE-1032 luminaire features aluminized reflectors and optically clear UV transmitting prismatic lenses for uniform light distribution. Options include multiple light sources and dimming.

The VLS systems are available in a variety of configurations to fit your precise application.

Physical Specifications for VLS-1/1032

Model VLS-2/1032

SPECIFICATIONS (subject to change)		Physical Dimensions			Electrical
Model	Description	Height (of Luminaire)	Width	Depth	Power-Watts
VLS-1/1032	Vertical Luminaire Stand w/GLE-1032 High Output Luminaire	70 - 88" (178 - 224 cm)	34" (86 cm)	30" (76 cm)	336
