# DIVS-Pro

## D5000 Viewing System for Heidelberg QMDI Pro Press

**ISO 3664 Standard\* Viewing Conditions**  
**Quick and Easy to Install**  
**LiteGuard II Viewing system Monitor**  
**Helps Maintain High Quality Color Reproduction**

### Accurate D50 Standard Viewing Right on the Console

The DIVS-Pro viewing system is designed to provide consistent and accurate ISO Standard viewing conditions on the viewing surface of the Heidelberg QMDI Pro digital press. The DIVS-Pro is easy to install and operate, and comes complete with the LiteGuard II viewing system monitor (indicates when unit is warming up and when unit needs to be relamped).

Proper viewing conditions help the press operator detect color shifts before they become problems. Correct color quality and light intensity assure consistent color rendition and visual agreement with all other standard viewing facilities.

### **\*ISO 3664: Viewing Conditions - Graphic Technology and Photography**

This standard was established to enhance color reproduction and color communication world wide. Compliance requires a system approach and encompasses:

- **Light Quality (D50)**
- **Light Intensity (2000 Lx)**
- **Eveness of Illumination**
- **Surround Conditions (neutral matt gray)**
- **Geometry (minimized glare)**

Model DIVS-Pro

*The DIVS-Pro assures that images viewed at the press console visually agree with all other standard viewing locations in the world.*
